

In The Specification:

Please replace paragraph [0061] of the specification, beginning at page 25, line 9, with the following replacement paragraph.

[0061] As noted above, in some embodiments code 215 may correspond to one or more of the software modules of IM system 10 illustrated in FIG. 1. In the illustrated embodiment of computer system 20, code 215 resides in memory 210. Memory 210 may be one embodiment of a computer-accessible medium configured to store program instructions and/or data such as included in code 215. However, in other embodiments, the program instructions and/or data included in code 215 may be received, sent or stored upon different types of computer-accessible media. Generally speaking, a computer-accessible medium may include storage media or memory media such as magnetic or optical media, e.g., disk or CD-ROM included in some embodiments of computer system 20 as mass storage device 250. A computer-accessible medium may also include volatile or non-volatile media such as RAM (e.g. SDRAM, DDR SDRAM, RDRAM, SRAM, etc.), ROM, etc, that may be included in some embodiments of computer system 20 as memory 210. Computer-accessible media that are capable of storing data, such as, e.g., any of the examples of physical media mentioned previously, may also be referred to as computer-accessible storage media. Further, a computer-accessible medium may include transmission media or signals such as electrical, electromagnetic, or digital signals, conveyed via a communication medium such as network and/or a wireless link, which may be included in some embodiments of computer system 20 as network interface device 260.
